Topic	Owner	
Open questions: <ul style="list-style-type: none"> - Jail class to store people who are in jail and release people - Should we have a bank class? → already implemented (at least parts of it) - "I think it would be better if i am responsible to class design and you guys tests,GUI and so on? maybe i need a person to help me" → We should design the classes as a group, so we don't miss any features etc - Do we need a card class? - Change the Board class so it loads the properties from the excel document rather than hard-coded - Is card have the same requirement? - Is it possible to make jail a function EX:gotojail? 		
Reflection last sprint: <ul style="list-style-type: none"> - Connecting classes: Planning of the classes was a bit short sighted and the documentation is quiet poor (hard to understand how they were working) → not complete - Pot luck / opportunity cards - Complete - Buying properties - Complete - Jail - Incomplete 		
<ul style="list-style-type: none"> - Before our meeting, push all the changes into the master so we all have the same version - Goal for next week: Connecting all classes to a working prototype - Work in class design diagram
