Sprint 4

1) Summary	
Sprint leader(s)	Vivien
Sprint start date	07/04/2020
Sprint end date	14/04/2020

2) Individual key contributions	
Team member	Key Contribution(s)
Neumann, Vivien	Going through the previous sprint documents, Planning next sprint (incl. task cards, requirement analysis) Software Design Diagrams
Jiao, Haotian (Hallton)	Documentation and finishing features
Wang, Mingfeng (Foret)	Documentation and finishing features
Banes, Hayden J	Documentation and finishing features + Test class
Tang, Zhenyu (tang)	Documentation and finishing features

3) User stories / task card
Task Card 1: - **Finishing all features** we have implemented so far so we don't need to touch them anymore - **Standard Code Documentation** (Comments and JavaDoc) - Having a **running prototype** at the end of this sprint - Writing **test** class - Adjust **Software Design Diagrams**

Sprint 4

4) Requirement analysis

5) Design

6) Test plan and evidence of testing

7) Summary of sprint
→ Due to the Easter holiday, we planned a fairly short sprint to have enough time to catch up, improve features and also enjoy the Easter weekend.   - Everyone improved their code documentation and enhanced the features if necessary   - Diagrams: Use Case Diagrams for the Scenarios/Task Cards are now all done   - Foret updated the class diagram
